

## Emergency Medicine Oral Board Preparation & Review

David Howes, Rohit Gupta

Imprint: Appleton & Lange

Pub Date: October 2008

ISBN: 9780071445078

Format: Paperback

Subject Area: Appleton and Lange's Review Books

Pages: 256 - Illustrations: 75

Price: A\$199.00/NZ\$222.00

### Description

*Based on material developed by successful teachers and recent examinees.*

This unique exam prep is the first resource to specifically address every key requirement for emergency medicine oral board success, basic exam preparation, managing information, understanding basic principles of care management and avoiding specific pitfalls.

### Key Features

- Written by respected EM educators and young EM physicians who have recently successfully taken the Oral Boards
- Thorough coverage of exam mechanics - reviews the when, where and how of the oral boards

### Market

Emergency Medicine Clinicians and Residents

### Table of Contents

1. Probability
2. P values
3. Confidence Intervals Key Concepts
4. Sensitivity and Specificity
5. Predictive Values
6. Likelihood Ratios
7. The Risks of Relativity
8. Number Needed to Treat
9. Bias

10. Spectrum Calculations
  11. Confounders the Literature of Emergency Medicine
  12. The problems of the body of "Emergency Medicine Literature"
  13. The application of Emergency Medicine literature to Continuous Certification
- Types of Literature
14. Textbooks
  15. Retrospective Trials
  16. Prospective Trials
  17. Meta-Analyses
  18. Integrative Studies
  19. Qualitative Studies Evaluating an Article
  20. Internal Validity
  21. External Validity Finding Information When Seconds Count
  22. Searching Medline
  23. Using the Internet
  24. Personal Databases
  25. Other Sources Medical Decision Making in the ED
  26. Action and Testing Thresholds
  27. Disease Likelihood and Bayesian Analysis
  28. Weighing Treatment Benefits and Harm Putting It All Together: An Evidence-Based Shift in the Emergency Department

### **Author Biography**

**David Howes, MD** is Associate Professor and Residency Program Director, Division of Emergency Medicine, University of Chicago School of Medicine.

**Rohit Gupta, MD** is Assistant Professor, Division of Emergency Medicine and University of Chicago School of Medicine.

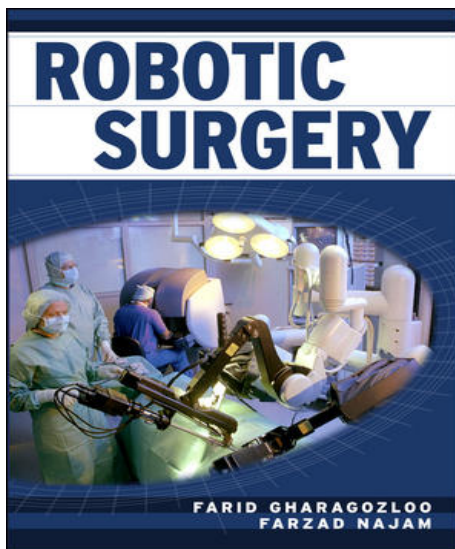

### **Backlist Titles Also Available**

9780071410250 - Emergency Medicine Manual 6ed - Ma et al

## Robotic Surgery

Farid Gharagozloo, Farzad Najam  
Imprint: McGraw-Hill Medical

Pub Date: October 2008  
ISBN: 9780071459129  
Format: Hardback  
Subject Area: Surgery  
Pages: 708  
Illustrations: 350  
Price: A\$270.00/NZ\$295.00

### Description

*Look ahead to the future of surgery-with the first comprehensive robotic surgery reference.*

Representing a landmark in the medical literature, *Robotic Surgery* is the first complete robotic surgery sourcebook. In its pages, you'll explore the new frontiers of robotic and remote technologies, which bring us closer to the goal of achieving the benefits of traditional surgery with the least disruption to the normal functions of the human body. The authors take you through the fundamental principles of robotic surgery and provide clear instruction on their clinical application.

### Key Features

- Up-to-date information and advice on how you can integrate robotic surgery into your clinical practice right now
- Broad, step-by-step coverage of surgical procedures that spans cardiac, thoracic, general and urologic surgery, encompassing everything from robot-assisted mitral valve repair to robotic gastric surgery and robotic donor nephrectomy
- Important focus on how the implementation of robotic surgery principles and procedures leads to improved surgical outcomes

### Market

General Surgeons, Equipment Industry, Cardiothoracic Surgeons, Urologic Surgeons

## Table of Contents

Foreword General Section 1. Preface 2. Overview of Robotic surgery 3. Robotic surgery: Technology, from Zeus to da Vinci 4. Physiological Advantages of Minimally Invasive Surgery 5. Psychological Impact of Minimally Invasive Surgery 6. Economic Considerations in Minimally Invasive Surgery 7. The Operating Room Design for Robotic Surgery 8. Anesthesia for Robotic Surgery 9. Critical Care for Robotic Surgery Cardiac Surgery 1. Robotics in Cardiac Surgery 2. Single Vessel Small Thoracotomy Robotic Assisted CABG 3. Multivessel Small Thoracotomy Robotic Assisted CABG 4. Robotic Assisted Totally Endoscopic Closed Chest CABG 5. Robotic Assisted Mitral Valve Repair 6. Robotic Assisted Atrial Septal Defect Closure 7. Robotic Assisted Pulmonary Vein Ablation 8. Robotic Assisted Transmyocardial Revascularization: 9. Robotic Assisted Epicardial Lead Placement Thoracic Surgery 1. Robotics in Thoracic Surgery 2. Robotic Lobectomy, Evolution from VATS to RAVS 3. Robotic Lobectomy 4. Robotic Surgery for Benign Esophageal Diseases 5. Robotic Heller Myotomy- Abdominal Approach 6. Robotic Heller Myotomy- Thoracic Approach 7. Robotic Paraesophageal Hernia Repair 8. Robotic Nissen Fundoplication 9. Robotic Belsey Repair 10. Robotic Assisted Transhiatal Esophagectomy 11. Robotic Assisted Ivor-Lewis Esophagectomy 12. Robotic Mediastinal Surgery General Surgery 1. Robotics in General surgery 2. Robotic Gastric Bypass for Obesity 3. Robotic Gastric Surgery 4. Robotic Pancreatic Surgery 5. Robotic Abdominal Aortic Surgery 6. Robotic Colorectal Surgery 7. Robotic Recto-Vaginopexy Urological surgery 1. Robotics in Urology 2. Robotic Assisted Prostatectomy 3. Robotic Sacral Colpopexy 4. Robotic Assisted Pyeloplasty 5. Robotic Donor Nephrectomy New Frontiers 1. The Application of Robotic Principles in Telemedicine 2. The Role of Robotic Surgery During Space Exploration 3. New Horizons in Robotic Surgery

## Author Biography

**Farzad Najam, MD, FACS**, is associate director of cardiac surgery and assistant clinical professor of surgery at the George Washington University Medical Center in Washington, DC.

**Farzad Gharagozloo, MD, FACS**, is surgeon-in-chief and director of the Washington Institute of Thoracic and Cardiovascular Surgery, and clinical professor and chief of cardiothoracic surgery at the George Washington University Hospital in Washington, DC.

## **Molecular Neuropharmacology: A Foundation for Clinical Neuroscience, 2/e**

Eric J. Nestler, Steven E. Hyman, Robert C. Malenka

Imprint: McGraw-Hill Medical

Pub Date: October 2008

ISBN: 9780071481274

Previous Edition ISBN: 9780838563793

Format: Paperback

Subject Area: Neuroscience

Pages: 650 - Illustrations: 350

Price: A\$85.00/NZ\$95.00

### **Description**

*An accessible yet comprehensive handbook for students and professionals.*

Sporting a new, full-color look, *Molecular Neuropharmacology* is a highly readable primer on how brain chemistry relates to normal brain function. Inside, medical students will find key information about neurologic and psychiatric diseases and how to treat them, while novice neuroscientists will learn how the molecular mechanisms of proteins, messengers and receptors affect the systems of an organism.

In order to provide the most accessible tutorial available, the authors have included a greater number of photos than ever, as well as more concisely written content. Plus, fact boxes can be found throughout to help reinforce learning of complex subject matter. Divided into three sections: Fundamentals of Neuropharmacology, Neural Substrates or Drug Action and Neuropharmacology of Specific Functions and Disorders-*Molecular Pharmacology* is ideal for those who need a quick, efficient lesson about treating neurologic diseases and disorders.

### **Key Features**

- Updated edition has an attractive full-color design with more illustrations
- Includes numerous Fact Boxes to help reinforce learning

### **Market**

Pharmacy and Medical Students, Neuroscientists, Neurologists and Pharmacologists

## **Table of Contents**

1. Neurons and Glia
  2. Synaptic Transmission
  3. Signal Transduction Pathways
  4. Signaling to the Nucleus Neural Substrates of Drug Action
  5. Excitatory and Inhibitory Amino Acids
  6. Catecholamines
  7. Serotonin, Acetylcholine, and Histamine
  8. Neuropeptides and Purines
  9. Neurotropic Factors
- Neuropharmacology of Specific Functions and Disorders
10. Autonomic Nervous System
  11. The Neuroendocrine System
  12. Control of Movement
  13. Mood and Emotion
  14. Reinforcement and Addiction
  15. Higher Cognitive Function and Psychosis
  16. Sleep, Arousal and Attention
  17. Pain
  18. Memory and Dementia
  19. Seizures and Stroke

## **Author Biography**

**Eric J. Nestler, MD**, is professor and chairman of the Department of Psychiatry and the Center for Basic Neuroscience at the Southwestern Medical School, Graduate School of Biomedical Science in Dallas, Texas.

**Stephen E. Hyman, MD**, is provost of Harvard University and professor of neurobiology at Harvard Medical School.

## Case Files: Physiology, 2/e

Eugene Toy, Norman Weisbrodt, William Dubinsky, Roger O'Neil, Edgar Walters,  
Konrad Harms

Imprint: McGraw-Hill Medical

Pub Date: October 2008

ISBN: 9780071493741

Previous: 9780071445757

Format: Paperback

Price: A\$46.99/NZ\$52.00

Subject Area: Physiology

Pages: 456 - Illustrations: 25

### Description

More than 50 high-yield physiology cases, each with USMLE-format review questions, help medical students excel in the physiology course and ace the USMLE Step 1.

### Key Features

- 50+ total cases students must know to ace course exams and USMLE Step 1
- NEW: Improved USMLE-format review questions for each case
- Clinical pearls highlighting key concepts accompany each case
- Primer on how to approach clinical problems teaches students how to think like doctors
- Proven learning system-based on Eugene Toy's award-winning research improves shelf exam scores
- Written by experienced educators

## Nurse to Nurse: Wound Care

Donna Scemons, Denise Elston

Imprint: McGraw-Hill Medical

Pub Date: October 2008

ISBN: 9780071493970

Format: Paperback

Subject Area: Nursing

Pages: 304 - Illustrations: 40

Price: A\$44.95/NZ\$50.00

### Description

*The latest information on wound care in a comprehensive yet portable resource.*

Written by the chair of the Education Committee of the Wound, Ostomy and Continence Nursing Association, this is the first text on wound care to be both comprehensive in scope yet small enough to fit into a lab coat pocket. All of the latest information on wound care is now available at your fingertips.

Part of the new Nurse to Nurse series, this title features coverage of the principles behind acute as well as chronic wounds. The authors include assessment and evaluation principles, how to stage or classify any wound, and practical hints on wound measurement and wound care. You will also find documentation and reimbursement tips for many healthcare settings.

### Features:

- PDA download of the entire text
- Wound care suggestions along with advantages and disadvantages so you can make fully informed decisions about wound care
- In abbreviated format, all the considerations that must be made when treating wounds of differing pathophysiology and in multiple healthcare settings
- The most current scientific evidence on wound care
- Coated flex-binding repels stains
- The new Nurse to Nurse series is specifically designed to simulate the teaching experience nurses learn best from trusted mentors carefully explaining what they must do in specific clinical situations. Written in a consistent, single author voice, this series brings the wisdom and

experience of some of the foremost experts to non-specialist nurses in clinical care

### **Key Features**

- Co-author Donna Scemons is a world-recognized expert on wound care
- The only text on wound care that is both comprehensive in scope yet small enough to fit in a lab coat pocket
- Includes full text PDA download
- Coated, flex-binding repels stains and portable trim-size

### **Market**

Practicing nurses in an acute care environment and LPNs in acute care or long-term care environments.

### **Table of Contents**

Chapter 1: General considerations for all wounded patients/clients Legal and regulatory aspects of wound care  
Ethics and wound care  
Co-morbidities that effect wounds and wound care  
Psychosocial considerations in wounds and wound care  
Chapter 2: Wound assessment Anatomy and physiology review of skin and supporting organ systems (e.g. cardiovascular – how it impacts wound healing)  
Wound assessment, measurement, outcome measurement  
Diagnostic Tools  
Chapter 3: Wound Care and Management Principles Wound cleansing  
Wound Debridement: how and when to select  
Application and removal of dressing tips  
Dressing types and rationale for selection  
Chapter 4: Wound Documentation and Monitoring Available documentation tools  
Additional components of wound care

### **Author Biography**

**Donna Scemons, RN, FNP, MSN, CNS, CWOCN**, serves as the Education Committee Chair for the Wound, Ostomy and Continence Nurses Association (WOCN). Donna is the President and CEO of Health Care Systems, Inc., in which she provides educational programs and clinical consultation to hospitals, skilled nursing facilities, managed care organizations and home health/hospice agencies. Donna also works part-time as an acute care family nurse practitioner with Kaiser Permanente.

**Denise Elston, RN, BSN, CWOCN**, is a Wound, Ostomy, Continence Nurse with Kaiser Permanente.

## Pharmacy Management: Essentials for All Practice Settings, 2/e

Shane Desselle, David Zgarrick  
Imprint: McGraw-Hill Medical

Pub Date: October 2008  
ISBN: 9780071494366  
Previous: 9780071418690  
Format: Paperback  
Price: A\$88.00/NZ\$98.00  
Subject Area: Pharmacy  
Pages: 640 - Illustrations: 40

### Description

*Pharmacy Management* addresses all aspects of pharmacy management, including people, materials, money, time and information, applicable to all practice settings. It covers everything from personal management to managing operations (business planning, quality control and managing technology) human resources management, financial management and marketing.

### Key Features

- New chapter on Leadership: While management and leadership are distinct concepts, they are often taught together in pharmacy management courses
- Completely new version of chapter on Accounting, Financial Statements, and Financial Analysis (shorter and better focused on what pharmacists are interested in)
- New chapter on Medicare Part D: Needed because of the huge impact it has had on pharmacy (particularly community pharmacy)
- Evidence-based: Management theory and models directly applied to pharmacy practice with appropriate cases and examples
- Chapter-opening learning objectives and case study
- Chapter-closing Q&A

### Market

## First Aid Q&A for the NBDE Part I

Derek M. Steinbacher, Steven R. Sierakowski

Imprint: Appleton & Lange

Pub Date: October 2008

ISBN: 9780071508667

Format: Paperback

Subject Area: First Aid Series

Pages: 576 - Illustrations: 150

Price: A\$69.99/NZ\$77.00

### Description

*Practice and Study Guidance for NBDE Test-Takers.*

An ideal companion book for *First Aid for the NBDE Part I*, this thorough guide contains 800 board-format review questions written by students who passed the test; here, the authors direct their focus on exactly what you most need to study in order to pass the exam.

### Key Features

- More than 800 NBDE Part I-format questions
- Works in conjunction with First Aid for the NBDE Part I
- Includes a comprehensive practice test

### Market

Medical Students.

### Table of Contents

## Current Diagnosis and Treatment in Pediatrics, 19/e

William Hay, Myron Levin, Robin Detering, Judith Sondheimer

Imprint: Appleton & Lange

Pub Date: October 2008

ISBN: 9780071544337

Previous Edition ISBN: 9780071463003

Format: Paperback + CD

Subject Area: Pediatrics

Pages: 1350 - Illustrations: 600

Price: A\$110.00/NZ\$120.00

### Description

*A Practical, Heavily Updated Edition of a Pediatrics Classic.*

*CURRENT Diagnosis and Treatment in Pediatrics, 19/e* has long been the go-to guide for students, residents, and practitioners looking for concise, reliable and up-to-date information. The 19th edition contains several new features, including a chapter on sports medicine, a key area of pediatrics for which students and residents state they need more training (ACGME survey) completely reorganized section on Infectious Diseases and an expanded section on key lab and reference values. In addition, the "Essentials of Diagnosis and Treatment" bulleted lists provide clear overviews of critical matter and instant guidance on treating both common and rare problems encountered in the care of children.

### Key Features

- CD-ROM with clinical images and references that link to web resources
- The best-selling midsize pediatrics book on the market

### Market

Pediatricians, Pediatrics Residents, Pediatric Nurse Practitioners, Family Practice, Medical Students.

## Table of Contents

1. The Newborn Infant
2. Child Development
3. Adolescence
4. Substance Abuse
5. Eating Disorders

## Lange Instant Access: EKGs and Common Cardiac Studies

Anil Patel

Imprint: McGraw-Hill Medical

Pub Date: October 2008  
ISBN: 9780071545235  
Format: Paperback  
Subject Area: Cardiology  
Pages: 224  
Illustrations: 140  
Price: A\$44.95/NZ\$50.00

### Description

*A comprehensive study guide for residents and recertifying surgeons*

The fifth and newest addition to our LANGE Instant Access series, *EKGs and Cardiac Studies* is the ideal tool for students and practitioners for interpreting common and uncommon EKG tests. The medical profession has been relying more and more on these tests and given the increasing emphasis by medical schools on clinical skills, the need for quick, easy access to information on the subject of EKGs has grown immensely. *EKGs and Cardiac Studies* answers this need.

Ideal for students and residents on the search for as many quality resources for interpreting EKGs in typical disease states, this comprehensive guide explains how details how EKGs work and presents content in clear, easy-to-understand tables and EKG strips. All content is supported by evidence based on real findings and references.

### Key Features

- EKGs are among the most common tests in medical practice today and demand for up-to-date books on the subject is unprecedented

### Market

3rd year medical students, IM residents, FP residents, Nurse Practitioners and Physician Assistants

## Table of Contents

## McGraw-Hill's I.V. Drug Handbook

Patricia D. Schull

Imprint: McGraw-Hill Medical

Pub Date: October 2008  
ISBN: 9780071548632  
Format: Paperback  
Subject Area: Nursing  
Pages: 1088  
Price: A\$70.00/NZ\$77.00

### Description

*Administer I.V. medications knowledgeably, safely and confidently.*

Because there is no room for error, turn to *McGraw-Hill's I.V. Drug Handbook*. Featuring a strong focus on patient safety, administering and monitoring I.V. drugs, the Handbook delivers concise, practical guidance to help you carry out one of the most difficult tasks you face. Written by and for practicing nurses and pharmacists, the Handbook is reliable, comprehensive and easy-to-use.

Everything you need for safe, successful I.V. drug administration:

- Includes antibiotics, insulin, pain medications, emergency drugs and more coverage of chemotherapeutic agents with more supportive therapies than you'll find in any other text
- Provides the most comprehensive, specific, evidence-based guidelines on administering high-alert and hazardous drugs available anywhere
- Each drug monograph includes administration guidelines, covering preparation, dilution & compatibility, infusion rates, admixtures, supportive therapies and monitoring
- Features a 32 page full-color patient safety insert describing measures for ensuring safe drug administration, including 6 pages on inserting an I.V. catheter
- Uses distinctive icons to call your attention to "clinical alerts," "life-threatening reactions," "high-alert", "hazardous" drugs and more

## Key Features

- Includes full-text PDA download of the entire text
- More coverage of chemotherapy than any other competitive title
- 4-color patient safety insert

## Market

Advanced Practice Nurses, Nurse Practitioners, Clinical Nurse Specialists and Nurses that work in critical care units or areas of advanced practice.

## Table of Contents

Foreword Preface and User's Guide

Part I: Administering Parenteral Drugs

Part II: General Intravenous Drugs A to Z

Part III: Chemotherapy Drug Monographs with Supportive Therapy

Appendices

## Author Biography

**Patricia Dwyer Schull, MSN, RN**, has been in medical publishing for more than twenty years. Prior to establishing MedVantage Publishing, Patricia held executive management positions with the top medical publishers in the world. She has edited and authored many popular nursing publications including several drug titles. Before entering the publishing business, Patricia spent 16 years in various aspects of nursing management, direct patient care and staff education as a professional registered nurse.

- Explains the terminology and abbreviations used within the subfield of lamellar corneal surgery
- Includes valuable section devoted to paediatric corneal surgery
- Covers rarer issues such as burn trauma

### Key Features

- Illuminates techniques and key concepts in every chapter, with over 1000 full-colour clinical and intraoperative photographs and other illustrations throughout

### Market

*Lamellar Corneal Surgery* is intended to be read by Ophthalmologists.

## **Author Biography**

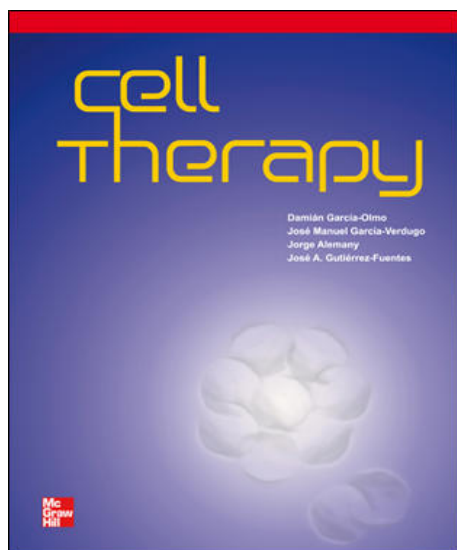

**Thomas John, MD**

Clinical Associate Professor at Loyola University  
Chicago, IL.

## Cell Therapy

Damián García Olmo, José Manuel García-Verdugo

Imprint: SPAIN M-H

Pub Date: October 2008

ISBN: 9788448167028

Previous Edition ISBN:

Format: Hardback

Subject Area: Genetics

Pages: 528

Price: AUS\$ 165.00/NZ\$ 175.00

### Description

*Cell Therapy* is comprised of thirty-one chapters. The subjects range from those describing basic research to those dealing with attempts at application to patients. In all of the chapters there is a wonderful display of available tools and techniques ranging from molecular biology to cell biology to clinical skills.

The book presents the state of the art at the present time and points directions for future research. It provides a valuable overview of all aspects of research designed to advance the field of somatic cell therapy.

*Cell Therapy* also includes a contribution from Professor Edward Donnall Thomas, 1990 Nobel Laureate in Medicine and co-recipient Joseph E. Murray for their discoveries concerning organ and cell transplantation in the treatment of human disease.

This work has been divided into three sections.

- General aspects of somatic cell therapy, with various chapters which cover its: origin, evolution, biology, biomaterials and ethics, among others areas
- Cell sources for somatic cell therapy. Some of the chapters include subject areas coming from cells of the umbilical cord blood transplantation, hepatic stem cells, amniotic fluid derived pluripotent stem cells
- This is a totally updated book (with the exception of some articles) no other publication treats this subject matter this way or in such depth

## Key Features

- This is a totally updated book (and with the exception of some articles)
- No other publication treats this subject matter this way or in such depth
- This title has 77 contributing Authors, of which 44 are from Europe
- An extensive glossary is included to help non-specialists with the most common terms

## Market

*Cell Therapy* is written by a distinguished panel of specialists and is intended to be read by Medical Physicians, Pharmacists, Biologists and Students in all areas of biomedicine.

## Table of Contents

Preface

Editor's preliminary considerations
